

## SITS:Vision Statuses

In Oracle Student Systems (OSS) a student only had one status. In SITS:Vision there are two statuses:

- Student Status;
- Enrolment Status.

Student Status indicates the student's overall status on a programme (e.g. enrolled, suspended, and withdrawn). Enrolment Status is more granular and gives a clearer indication of their status on their current year of programme. They are usually both the same, but in some cases they are different such as if the student has been progressed and is now eligible to enrol on their next year of study.

The table on the next page includes all student and enrolment statuses, and also how they relate to old OSS statuses. The key changes are as follows:

- OSS status of 'Inactive' has been replaced by a number of statuses to make a student's situation clearer;
- OSS status of 'Lapsed' has been replaced with 'Withdrawn'. The reason for withdrawal identifies which students have lapsed;
- OSS status of 'Intermit' has been replaced with 'Suspended' and 'Suspended Assessment' only;
- OSS status of 'Completed' has been split in to 'Completed - Leave to Supplicate' and 'Completed - Conferred';
- OSS status of 'Discontinued' has been split to give more granular indication of why a student has left;
- Some OSS 'Holds' have been replaced by statuses.
